

UniTel AUTHORIZATION AND RELEASE

PREMISE WORK (Owner):

1. UniTel may, in its discretion, install and attach fiber optic cable and copper wire with premise equipment on the exterior and interior of Owner's premises. This premise work may or may not consist of drilling holes into and through interior and exterior walls, placing screw anchors, and placing equipment on or within the building to secure cables and equipment deemed necessary for the installation of the provided service.
2. The location of UniTel cable, wire and equipment shall be determined suitable by UniTel and acceptable to Owner, for the purpose of providing high-speed internet service.
3. In the event that service is disconnected and at the request of the owner, all equipment shall be removed, and UniTel shall plug the any holes with clear caulk and have no further obligation or liability to Owner.
4. Except for the obligations of UniTel described herein, UniTel shall have no further obligation to Owner and Owner hereby agrees to release and hold harmless UniTel from any claims for property damage or injury to the premises. It is understood and agreed that cable and wire must be attached to and run through exterior surfaces into the interior of Owner's premises.
